2.1 Class Class The pr 2.2 Label Label This p Other Furthe	<ul> <li>2.1 Classification of the substance or mixture Classification according to Regulation (EC) No 1272/2008 The product is not classified according to the CLP regulations</li> <li>2.2 Label elements Labelling according to Regulation (EC) No 1272/2008 This product does not need to be labelled in accordance with EC Regulations and Directives</li> <li>Other labelling information Further information: Handle in accordance with good industrial hygiene and safety practise</li> <li>2.3 Other Hazards Unlikely to cause harmful effects under normal conditions of handling and use</li> </ul>				
3. Composition	/information on i	ngredients			
3.1 Mixtu	re				
Sodiun	ical Name		<b>CAS-No.</b> 7647-14-5	ling to Regulation (EC) <b>EC-No.</b> 231-598-3 king additive, Sodium he	No. 1907/2006 <b>Amount %</b> >99.9%w/w (on dry basis) exacyanoferrate (II) – E535
4. First Aid mea	isures				
	<b>iption of first aid</b> al advice	measures No known delayed	effects		

If inhaled: Remove patient from exposure

In case of skin contact: Wash off with plenty of water

[Cont....]

AquaSPArkle Pure Spa Salt

4.1 Description of first aid	measures
In case of eye contact:	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes Remove contact lenses - eyelids should be held away from the eyeball to ensure thorough rinsing. Get medical attention if irritation continues.
If Ingested:	DO NOT induce vomiting. Wash out mouth with water and give 200-300 ml (half a pir of water to drink. Obtain medical advice if ill effects occur

5.1 Extinguishing media	:
Suitable media:	This product is non flammable. Use extinguishing measures that are appropriate to th surrounding environment.
Unsuitable media:	None
5.2 Special nazarus aris	-
5.2 Special hazards aris	ing from the substance or mixture
	Salt withstands temperatures up to its melting point and beyond without decomposing
	but at very high temperatures (greater than approximately 800oc), a vapour may be
Specific Hazards:	emitted which is particularly irritating to the eyes.
Specific Hazards: 5.3 Advice for fire-fighte	emitted which is particularly irritating to the eyes.

# 6. Accidental release Measures 6.1 Personal precautions, protective equipment and emergency procedures avoid prolonged contact with the skin and inhalation of dust concentrations no special protective clothing is required normal good handling and housekeeping practice is adequate an eyewash bottle with clean water should be available 6.2 Environmental precautions: Spillages or uncontrolled discharges into watercourses must be IMMEDIATELY alerted to the Environment Agency or other appropriate regulatory body

6.3 Methods and materials for containment and cleaning up Cleaning up Use mechanical handling equipment. Clean up promptly by scoop or vacuum. Keep in suitable, closed containers for disposal

6.4 Reference to other sections	For personal protection see section 8
	For disposal see section 13

# 7. Handling and storage

# 7.1 Precautions for safe handling

7.1.1 Protective measures

Protective measures
 Keep dust levels to a minimum, salt is non-flammable but static electricity can be generated by pneumatic conveying, therefore pipes should be bonded and earthed, especially in environments where a spark could prove hazardous.
 Avoid prolonged skin contact.
 Atmospheric levels should be controlled in compliance with the workplace exposure limit (see Section 8.1)

7. Handling and storage				
7.1.1.2	2 Advice on general occupational hygiene: Hygiene measures: Normal good handling and housekeeping practice is adequate			
7.2	<b>Conditions for safe stor</b> Storage Common Storage Conditions to avoid:	<b>age, including any incompatibilities.</b> Due to its hygroscopic nature, dried vacuum salt should be stored in a dry atmosphere Store away from concentrated acids Absorbs moisture if the relative humidity is greater than 75%		
8. Exposure control/personal protection				
	<ul> <li>8.1 Control parameters</li> <li>8.1.1 Occupational Exposure Limits <ul> <li>listed by H&amp;SE (Guidance Note EH40)</li> <li>WEL Recommended Limits:</li> <li>Total Inhalable Dust is: 10mg/m3 (8hr TWA)</li> <li>Respirable Dust is : 4mg/m3 (8hr TWA)</li> </ul> </li> </ul>			
8.2	Exposure controls			
Engineering measu		Static electricity can be generated by pneumatic conveying; therefore pipes should be bonded and earthed, especially in environments where a spark could prove hazardous		
	Personal protective equipment			
	Respiratory protection	No specific recommendation made, but protection against nuisance dust must be used when levels above $10 \text{mg/m}^3$		
	Hand protection	Protective gloves complying with EN 374 Dry salt and concentrated solutions can cause withdrawal of fluid from the skin		
	Eye protection	Wear tightly fitting safety goggles approved to standard EN 166.		
	Skin and body protection	No special protective equipment required		
	Environmental exposure	e controls • Contain any spillage • Avoid discharges to the environment where possible		

# 9. Physical and chemical properties

L

# 9.1 Information on basic physical and chemical properties

Appearance	: white/colourless crystalline solid
Odour	: odourless
Odour threshold	: not applicable
рН	: 10.0 approx. (10% solution)
Melting point	: 802o c
Boiling point	: 1413o c
Flash point	: non-flammable
Flammability	: non-flammable
Upper flammability limit	: non-flammable
Lower flammability limit	: non-flammable
Vapour pressure	: 2.4mm Hg @ 747o c
Vapour Density	: not applicable
Relative density	: up to 2.165 g cm -3 @20o c
Water solubility	: 35.9 g/100g @ 0o c ; 39.2 g/100g @ 100o c
Partition coefficient	: not applicable
Auto-ignition temperature	: non-flammable
Viscosity	: not applicable (solid)
Explosive properties	: not applicable
Oxidising properties	: not applicable

# AquaSPArkle Pure Spa Salt

Stabi	lity and reactivity	
10.1	Reactivity	
	Reactivity	Reacts with strong sulphuric acid or nitric acid
10.2	Chemical stability	
	Chemical stability	Stable under normal storage and handling conditions
10.3	Possibility of hazardous	s reactions
	Hazardous reactions:	Reacts with strong sulphuric acid or nitric acid
10.4	Conditions to avoid	
	Conditions to avoid	Under wet conditions can corrode many common metals, particularly iron, aluminium and zinc
10.5	Incompatible materials	
	Materials to avoid	Contact with strong sulphuric acid or nitric acid (hydrogen chloride gas is emitted)
10.6	Hazardous decomposit	ion products
	•	Trace amounts of hydrogen chloride gas may be evolved at temperatures in excess o 800°C

# 11. Toxilogical Information

### 11.1 Information on toxilogical effects

# **Acute Toxicity**

Inhalation: high concentrations of dust may be irritant to the respiratory tract Oral LD50, rat 3000 mg/kg Ingestion : May cause vomiting and diarrhoea. The swallowing of small amounts is unlikely to have any adverse effects. Salt is an essential constituent of the diet and provides important body electrolytes and is the source of hydrochloric acid present in gastric juices. The blood stream contains nearly 1% sodium chloride

Skin :	Repeated or prolonged contact may result in dryness leading to mild irritation
Eyes :	Dust may cause irritation
Mutagenicity :	Not considered to be a mutagen
Carcinogenicity :	Not considered to be a carcinogen
Reproductive Toxicity :	No reproductive effect Acute Oral LD50 Rat: 3,000 mg/kg
Long Term Exposure :	Repeated ingestion of excessive amounts may cause disturbance of body
	electrolyte and fluid balance

## **12. Ecological Information**

# 12.1 Toxicity

i i exiety			
A maximum value of 412 mg/l ensu	ires the pr	otection of all a	quatic life (Source: Water Research Centre -
Acute aquatic toxicity (Fish)	96hr	LC50	6,750 mg/l
Acute aquatic toxicity (Daphnia)	48hr	EC50	2,024 mg/l
Acute aquatic toxicity (Algae)	72hr	LC50	3,014 mg/l
Subacute aquatic toxicity (Fish)			433 mg/l
Subacute aquatic toxicity (Daphnia)	)		1,062 mg/l
BOD 5 day			0 mg/l
COD			0 mg/l
Earthworm toxicity			1,000 hg/cm2
.2 Persistence and degradability			
$\mathbf{L}$ i cisisicilice and uculauability			

# 12.2 Persistence and degradability

Persistence and degradability In water In soil / sediment Not applicable (quickly dissociates) Not applicable (inorganic substance)

### AquaSPArkle Pure Spa Salt

12. Ecolo	gical Information	
	Bioaccumlative potential Bioaccumlative potential	No potential for bioaccumulation
	Mobility in soil Mobility in soil	Predicted to have high mobility in soil due to its high solubility in water
	Results of PBT and PvB PBT and PvB :	: According to Annex XIII of REACH Regulation, inorganic substances do not require assessment
12.6	Other adverse effects Other adverse effects:	Do not flush into surface water or sanitary sewer system. Avoid subsoil penetration.

### **13. Disposal Considerations**

# 13.1 Waste treatment methods

-Disposal should be in accordance with local, state or national legislation

- -Do not reuse empty containers without commercial cleaning or reconditioning
- -Do not discharge into drains or the environment , dispose to an authorised waste collection point

## Classification

Waste Codes in accordance with the European Waste catalogue (EWC) are origin-defined. Since this product is used in several industries, no Waste Code can be provided by the supplier. The Waste Code should be determined in arrangement with your waste disposal partner or the responsible authority

### 14. Transport Information

Not classified as dangerous in the meaning of transport regulation

### 15. Regulatory information

### 15.1 Safety, health and environmental regulations/legislation specific for this substance or mixture.

## **15.2 Chemical Safety Assessment**

No data available

### **16. Other information**

Full text of H-statements referred to under sections 2 and 3

### **Further information**

Restricted to professional users. Attention - Avoid exposure- obtain special instructions before use
