

For the pool & spa professional

## Clean Cell Plus

2.5 Litre bottles packed 6 to a carton

### What is it?

Lo-Chlor Clean Cell Plus is a highly concentrated cell cleaner to remove calcium scale deposits and organic matter build up from salt chlorinator cells.

### Who needs it?

- A pool owner who is sanitising his or her pool using a salt chlorinator should use it regularly.
- Every serviceman should use it as an essential part of ongoing maintenance programs on salt pools.

### What does it do?

- Clean Cell Plus will remove scale, grime and organic build-up from salt chlorinator cells.

### What advantages does it have over other similar products?

- Superior strength.
- Won't damage cells unlike other harsher acid products such as hydrochloric acid.
- Reusable – effective for up to 3 applications!

### Professional tips:

- Pour Clean Cell Plus into a plastic container.
- Immerse the salt chlorinator cell in the plastic container for around 10 minutes. Heavily encrusted cells may require further treatment.
- Best results will be obtained when the cell is hosed in warm water before treatment.
- Whilst the product can be re-used, best results will always be obtained by using a fresh solution.
- We recommend that every pool owner who is sanitising his or her pool using a salt chlorinator should use our companion product Lo-Chlor Salt Cell Protector Plus on a regular basis.
- It will help make the chlorinator cell easier to clean and assist in extending its life.
- As well as limiting the build up of calcium scale on salt chlorinator cells, Lo-Chlor Salt Cell Protector Plus will soften any deposits, making them so much easier to remove.

### Terrific tip to takeaway:

- Try Clean Cell Plus for those hard to remove scum lines around the pool waterline. Just rub on with a damp cloth. You'll be amazed at the result.
- Don't forget to wear gloves.
