Reduction Gear Box

3:1 Domestic Reel Reduction Gearbox

- **Manual Reduction Gear Box**

Neat and simple, the Reduction Gear Box drastically reduces the force necessary to operate your Plastica Slidelock Reel.

- **Makes even the largest cover easy**

Makes light and easy work of even the largest standard domestic covers on indoor and outdoor pools.

- **Retrofits in minutes**

Delivered with all the required fixings to adapt with the standard Plastica Slidelock Reel System.

- **Totally maintenance free**

Using aerospace industry gearing and modern machinable polymers, the Reduction Gear Box is completely enclosed and maintenance free.

Reduction Gear Box

A Retrofit 3:1 Reduction Gear Box for Plastica Slidelock Domestic Swimming Pool Cover Reel System

- Safe & easy to use
- Maintenance free
- Neat & compact
- Simple & effective

Whatever size the pool, winding a cover can be hard work. Motorised systems are a great option, but the high cost can be prohibitive. In addition, the mechanics needed to make them work means they can often look large and cumbersome, not enhancing the look of the pool.

An Innovative, Affordable Solution

The Reduction Gear Box has been created to make these concerns a thing of the past. It is a simple, highly effective 3:1 ratio gearbox which makes light work of winding the cover onto the reel. It has been specifically designed to be retrofitted to the Plastica Slidelock Reel, making it an affordable option for everyone.
