

Affinity 8 Massage Table

AF81/N

This super couch is all about features and access with its ergonomic design. Reiki end panels, great levels of height adjustment and the shaped centre section all work together to ensure that therapists are able to work comfortably and ergonomically on their clients, whilst still offering the client an exceptional treatment experience.

The strong aluminium metal frame, Therafoam sports padding (covered in an extremely durable PVC upholstery) and sculpted design of the Affinity 8 makes it ideal for sports therapy, deep tissue massage and osteopathy. Although a really well built, substantial couch, weighing in at only 13.5kg it is truly portable.

Using the 8's arm-sling and face-cradle allows excellent access to the rotator cuffs for maximum effectiveness during treatment. For even more positioning options this couch also conveniently features a breathe-hole and plug. Portholes have been thoughtfully included at either end of the couch to facilitate even wear on the couch top as well as enabling the use of a paper towel holder at the same time as the face cradle frame.

As with all Affinity tables, the Affinity 8 sets up really simply and quickly (less than 7 seconds). All you have to do is undo the clips, ease the legs out and lift to standing. The height is easily adjustable thanks to one touch control on each telescopic leg. Due to the shape of the centre section the legs will need to be taken down before closing the couch. However, this takes seconds due to the clever design of the pop-up button.

In keeping with Affinity's commitment to looking after the therapist, a quality carry case featuring a large front storage pocket, metal zips and fixings and posture friendly carry handles, is included as standard.

KEY FEATURES:

- Therafoam sports padding
- Shaped centre section for improved access to lumbar and pelvic areas
- Strong PVC upholstery
- Extremely comfortable
- Quality construction
- Affinity ergonomic breathe hole and bung
- Reiki end panels
- Rapid set up
