

Blue Horizons

Ultimate Algicide Concentrate

Key Features

- Dual-action algae destroyer
- Copper-based algaecide
- Use for prevention and cure

Application Instructions

1. Maintain pH level within the ideal range of 7.2 – 7.6. If not in this range, adjust.
2. If algae are present, brush thoroughly with a pool brush.
3. Maintain free chlorine level within the ideal range of 1 – 3mg/l. If algae destruction dose is required, shock dose the pool to a minimum free chlorine level of 5mg/l.
4. Gradually pour the solution into the pool whilst the pump(s) are turned “on”, preferably near to the water inlets to aid distribution.
5. After the initial dose, this product should be applied once a week to prevent algae formation.

Litres	Gallons	Algae destruction	Initial dose	Weekly dose
4,546	1,000	66ml	33ml	8ml
11,365	2,500	165ml	83ml	20ml
22,730	5,000	330ml	165ml	40ml
45,460	10,000	660ml	330ml	80ml
68,190	15,000	990ml	495ml	120ml
