Thank you for your interest in the Catalina™ range of Hot Tubs

Catalina Spas UK Ltd is a family business that was first established in 1997. We continue to be the leaders in providing beautiful hot tubs to clients throughout the UK. We were one of the founders of BISHTA (British & Irish Spa & Hot Tub Association) and our hot tubs are listed in many buyers' guides including WhatSpa? and What Pool & Hot Tub? With a wealth of expertise, experience and support we have the finest selection of beautiful hot tubs waiting for you.

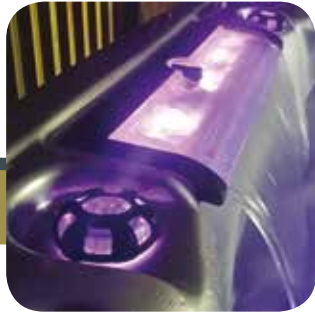

Catalina™ have perfected the art of combining the healing powers of warm water, massage

therapy, relaxation and the ultimate design to bring you a luxurious refuge to escape from the trial and stress of modern life. In this brochure we offer you Dream Maker™, Sunrise™, and the luxurious Catalina™ spa ranges, we are confident you will find a model that both suits your budget and desires. Simply choose the location in your garden or home and start to enjoy the experience of your own hot tub.

"One life, live it! What are you waiting for?"

"Everyday more and more people are realising the benefit of owning a Catalina™ Spa"

1. Professional - Since 1997 we at Catalina™ have supplied thousands of hot tubs to clients throughout the UK. Our show centres and in house team of trained experts will offer advice, information and recommendations to help choose the right hot tub for you. Whether it's for personal home use, holiday rental or full commercial, we have the ideal hot tub model for you. Our reputation and attention to detail has made us proud to be the preferred manufacturer of hot tubs for Sunseeker™ luxurious yachts.

2. Build Quality – Whether you choose a Dream Maker™, Sunrise™ or a Catalina™ you have the peace of mind that they are manufactured to the ultimate standards of quality and design. We only use components from tried and tested suppliers that include Aristech™ Acrylics,

Balboa™ control systems and Waterways™ pumps, jets and fittings.

3. Lifestyle – There is nothing more relaxing at the end of a long day than soaking in the warm therapeutic bubbles of your own hot tub from Catalina™. Spend more time with the family, loved ones or friends, your hot tub will bring real quality time, fun and entertainment.

4. Water Quality - All Catalina™ hot tubs are fitted with Waterways™ European made 2 speed filter pumps that provide 100% active filtration with Ozone purification. This is a proven, highly efficient and environmentally friendly method as it reduces the number of pumps to achieve spa filtration and hydrotherapy performance as well as providing a superior water quality. The filter/boost pump is a 2.5hp (1.87kW) which runs on only 1.8 Amps

Why Catalina™?

on low speed. It is in effect 2 pumps in one - this has several advantages, that includes a reduced electrical loading and increased efficiency. The Catalina™ filtration system gives 100% filtration in low speed - meaning that 100% of the circulating water is passing through the filters, depending on the volume of the spa the water is filtered every 10 minutes this gives the water an exceptional polish and sparkling clarity.

5. Low Running Cost - At Catalina™ Spas Ltd we only use the best insulation available that conforms to the strict California Energy Commission Standards. The California Energy Commission (CEC) was established in 1975 to reduce energy consumption and save on energy bills. It sets strict standards to ensure all CEC compliant products are energy efficient. As part of Catalina's commitment to also ensure our products

have low running costs all of our spas meet these high standards. The Catalina™ insulating process starts with the application of high density foam* that is spray applied to the reverse of the spa shell, under the contoured top lip and plumbing. The foam has a closed cell content of 90% and an insulation K factor of 0.16. This process not only gives the very best insulation values it also adds additional strength to the shell and provides a strong support for pipework. All our hot tubs are supplied with a deluxe UL listed safety/insulation cover.

* Only on Catalina™ Classic and Aquadynamic models. Dream Makers and Sunrise models use Roxul Insulation.

...Why Settle For Less?

Why Catalina™?

6. Built To Last – For nearly 40 years Catalina Spas USA have been producing beautiful hot tubs that are built to last. Whether its home is in the Californian heat, the humidity of Central America, the mixture of the Great British climate or the Ice and snow of Norway, Catalina Spas™ go on and on doing what they were designed to do. The Dream Maker™ range of rotationally moulded hot tubs offer an almost indestructible shell while the Sunrise™ and Catalina™ ranges are made from vacuumed formed acrylic. Whatever you choose you have the peace of mind it will last for many years to come. Our build standards, components and product performance history allows us to offer one of the best warranties in the industry of up to 10 years**

7. If You Need Us We Are Here – Having made the decision to own a hot tub from Catalina™ the experience does not stop on the day of delivery. It is

our priority to ensure your hot tub will continue to be an asset to your home and lifestyle. Either direct or through our show centres you will find all the advice and information you need to keep your hot tub at its best. Chemicals, accessories and parts are all available and simply a phone call or a click away. Your peace of mind is our priority and all our hot tubs are supplied with an industry leading warranty. If in the unlikely event your hot tub has a problem one of our industry trained engineers will soon have you back enjoying the hot tub experience. For that extra peace of mind we offer an extended warranty service plan, this comprehensive all-inclusive service offers a life time warranty (see terms).

8. Range Of Models – At Catalina™ we bring you three world premier brands offering 24 different models and sizes with prices starting from as little as £3,300, there is no need to compromise on quality to

achieve affordability. If you are looking for something larger like a swimspa or exercise pool then please ask for our swimspa and pool brochure where we offer a selection of 12 different model options.

9. Bespoke Hot Tub – This department of Catalina™ is where we design and manufacture hot tubs for bespoke projects. These include hotels, leisure centres, unique residential and where something extra special is needed. We are proud to include Sunseeker International™ and Horizon Yachts as just a few of our many blue chip clients.

10. Commercial – In addition to our hot tubs for residential use we have models ideal for holiday homes, cabins and commercial applications.

****See Model Specification**

Catalina™ For Your Health

Pain Relief - Hydrotherapy is proven to be a highly effective form of natural therapy which works by relaxing muscle tension and helping to reduce swollen joints giving you increased mobility and more importantly lessens pain. The soothing tranquil effect of the bubbles on your body will help relieve any stress and tension.

Circulation - Hydrotherapy has a remarkable ability to improve circulation by dilating the blood vessels. Your blood flow improves and takes oxygen and nourishment to all your cells and tissues.

Stress - In today's busy world you can be prone to stress related illnesses which can cause a wide range of physical and psychological problems. For example, high blood pressure, headaches, digestive complaints, insomnia, depression, anxiety attacks, the list is endless. Unfortunately, stress not only affects the mind but

more importantly your immune system. Hydrotherapy can provide you with the vital key to breaking the stress cycle of everyday modern life.

In short, hydrotherapy offers an excellent way for you to regain and maintain a healthy body and reduce aches and pains. Any natural treatment that can help you to revitalise and de-stress, without the use of drugs has got to be the way forward.

Dream Maker

Dream Maker Spas™

Dream Maker Spas™ is one of the world's largest manufacturers of rotationally moulded spas and has been a market leader since 1997.

Rotationally moulded hot tubs are made of one piece high-density polyethylene and offer unparalleled durability at a superior value. The natural strength of the material allows the spa to hold its form without the need for additional internal support materials and is virtually indestructible. This lightweight construction makes the spa easier to manage and more portable to move around. All polyethylene shells used on Dream Maker Spas™ are also environmentally safe and recyclable. Each spa is supplied with a 'super seal' insulation cover, Balboa™ digital control systems and pump, Waterways™ jets and equipment.

Each Spa Includes:

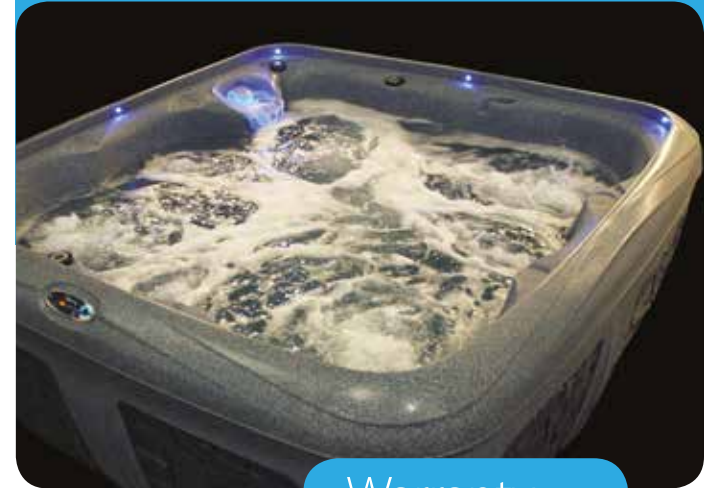

- Super Seal Cover
- Backlit LED Niagara Waterfall
- Convex2 Easy Clean Filter System
- Ozone
- Chemical Starter Kit
- Superior Roxul Green Guard Insulation
- 16 Amp C Form Plug with 3m Cable (Excluding 600L)

Colour Options

Ambience LED Lighting

To enhance your night time bathing session all Dream Maker™ Spas come fitted with exclusive LED Perimeter lighting and Waterfall as standard.

Made in 

Dream Maker

New

The New Dream 600L represents a revolutionary step forward in hot tub manufacturing. This specialist production process uses Linea High Density Polyethylene (LHDP) incorporating a special 'mica' fill package that produces a 'metallic' appearance.

This unique material combined with a specialist machined mirror finished mould ensures the Dream 600L is a hot tub with all of the looks and feel of acrylic but with the impact resistance, durability and reparability of LHDP.

"Affordability does not mean compromise on quality"

Dream Maker 600L

This 5/6 person hot tub with a full-body lounger has 30 adjustable jets that target shoulders, back muscles and feet for a wonderful massaging hydrotherapy experience. Enjoy the comfort pillow headrests to enhance your relaxation. For entertaining or unwinding, the MoonGlo Waterfall with Back-lit LED Light, LED Perimeter lights and LED cabinet lights are fitted to all as standard.

Features

Seating :	5/6
Dimensions	2030 x 2030 x 910mm
Water Capacity	1080 Litres
Dry Weight	179 kg
Jets	30 Adjustable Stainless Steel
Electrical :	20 Amps
Heater	3kW
Controls	Balboa™ Digital
Pump	3hp (2kW)

Colour Combinations

Sunrise

Sunrise Spas™

Sunrise Spas feature integrated internal steps, music systems and LED lights making them exceptional value for money.

Sunrise™ spas are made in Canada. We have represented Sunrise in the UK for over 7 years, they are highly reliable spas that incorporate attractive ergonomic design features and manufactured using the same tried and tested components from Balboa™ and Waterways™. From their range we have selected 2 models specifically for their size, performance, high equipment specification and value for money. Both have convenient internal steps for easy access without compromising bather space.

Built on a proven low cost platform consisting of a steel frame for support, a polyethylene capped bottom for protection and layered ROXUL panels for superior insulation, each model features a multi-colour safety and mood light and perimeter LED lighting. Both models have a waterfall feature with LED illumination, ozonator and MP3 audio system.

LED Lighting standard on all models

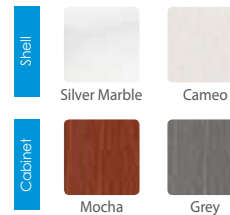

Warranty:

7 years shell.

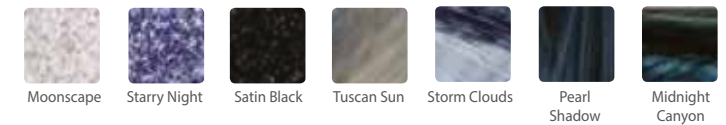

5 years equipment and plumbing.

The Catalina Spa™ Collection

Welcome to the Catalina Spas™ Collection, our flagship spa range.

Catalina Spas™ is a name synonymous with quality and design excellence, the spas featured within this brochure represent the epitome of hot tub engineering.

Each part of a Catalina Spa™ has been thoroughly tested, to ensure the perfect placement of jets, ergonomic seat contours and the exact amount of power required to provide the optimal massage experience. Only once all of these items are perfected does a hot tub earn the right to bear the Catalina Spas™ name.

On the opposite page we have a convenient model, size and equipment specifier.

Environmental statement: As one of the UK's oldest and largest suppliers of hot tubs, swimspas and exercise pools, Catalina Spas Ltd has a responsibility to not only provide our customers with products that are manufactured to the highest technical standards, they must also have a minimal impact on the environment.

The Directors and staff at Catalina Spas Ltd recognise that environmental protection is one of the most important issues facing the world today. Through continuous commitment we remain determined to identify potential for increased efficiency, implement waste minimization, monitor and reduce energy consumption and our consequential emissions of harmful greenhouse gases.

As part of our commitment we operate our own recycling plant at our Salisbury distribution centre and all Catalina spas and swimspas meet the standards set by the California Energy Commission standards who promote efficiency and conservation.

If you have specific power requirements or dimensions please call for more information.
