THERMECRO

Thermecro converts a staggering 92% of solar radiation that strikes it into hot water for your swimming pool or spa. Thermecro is not reliant on outside temperatures or direct sunlight so, unlike any other solar heaters on the market, it will work optimally in all weather conditions, temperatures and locations. Ideal solution for a secondary heating device.

FEATURES

- Generates far more hot water per m² than any other solar heating system
- Works even in the lowest of ambient temperatures
- Compact design in comparison to all other solar heating systems
- System is perfectly insulated so delivers hot water to the pool or spa with zero losses
- Signifi antly reduces your energy consumption
- Eco-Friendly reduces your carbon footprint
