# Pool Liner Warranty

## 10 YEAR LIMITED WARRANTY

Should any subsequent manufacturing defect, which is covered by this Warranty, become apparent within 12 months of purchase, your pool liner will be repaired or replaced free of charge, at the discretion of Plastica.

The following 9 years are pro-rata from the date of purchase. (Please retain your purchase invoice from the supplier).

This warranty is non-transferable. The original purchaser shall pay full list price in effect at the date of the claim, less 1/120 of the price for each full month remaining in the Warranty period.

## PLEASE READ CAREFULLY

This Warranty ensures a swimming pool liner free from defects in the material and workmanship under normal domestic use, service and conditions and where installed correctly by competent persons.

## THIS WARRANTY COVERS:-

Defects in material and faulty workmanship.

## PLASTICA:-

- 1 Plastica will only be responsible for the repair or replacement of a defective swimming pool liner, and will not be liable for any consequent or incidental damages arising out of such defects.
- 2 Plastica shall not be responsible or liable for the injury or damage to property caused directly or indirectly by the swimming pool lining.
- 3 All repairs or replacements shall be ex-works Plastica's factory and Plastica shall not be liable for freight, installation, service or labour costs.
- 4 This warranty is valid for the U.K. and Europe only.

## THIS WARRANTY DOES NOT EXTEND TO:-

- 1 A Plastica swimming pool liner which has been subjected to alteration, misuse, abuse, neglect, accident or flood.
- 2 Damage caused through incorrect chemical balance. Chemical levels must be kept within the levels recommended by the manufacturers. Excessively high levels of sanitizer will cause the pool liner to fade rapidly, and will also cause wrinkling/creasing of the PVC membrane.
- 3 Your domestic swimming pool liner is designed to be run up to a maximum temperature of 29°C (84° F). The warranty will be invalidated if the pool water temperature is run over 29°C (84°F).

- 4 Your swimming pool liner must always be kept full of water. Only a competent person should drain and refit and install a swimming pool liner.
- 5 Plastica will not be responsible for sites that have a high water table or underground springs. A high water table and underground springs must be dealt with by "de-watering" the pool area if a pool liner is to be installed. These sites will cause liner floatation and liner creasing.
- 6 Plastica will not be responsible for the pool structure. All pool surfaces must be compatible with the PVC membrane.
- 7 Patterned swimming pool linings may not align exactly. This is due to the stretch characteristic of the PVC membrane and specifically on larger designed patterns.

## USAGE

- 1 Treat the pool water with one chemical at a time.
- 2 Read the label directions first.
- 3 Dilute and completely dissolve all chemicals in a bucket of water.
- 4 Never use your hands to stir chemical solutions.
- 5 Allow each chemical solution to fully circulate and disperse throughout the pool.
- 6 ALWAYS add chemicals to the water, NOT the water to chemicals.
- 7 Never mix different chemicals together.
- 8 We do not recommend that you put chlorine tablets or sticks into the skimmer, as bleaching of the liner may occur when the filter pump is turned off.
- 9 NEVER broadcast dry chlorine directly into the pool. Doing so WILL result in bleach spots on the PVC.
- 10 We recommend the liquid chlorine is only added to liner pools by professional pool engineers.
- 11 Do not use the abrasive or acidic cleaning agents to clean the liner, especially the "bathtub" ring at the water line. Use only non-abrasive, non-acidic, non-solvent based products for cleaning the PVC liner. Abrasive cleaning will remove the pattern of printed liners. Acidic cleaner may discolour/weaken the pool liner print.
