Hazard statements:	H315	Causes skin irritation
	H319	Causes serious eye irritation
	H335	May cause respiratory irritation
Precautionary statements:	P280:	Wear protective gloves/protective clothing/eye protection/face protection
	P401:	Store locked up
	P101	If medical advice is needed, have product or label to hand.
	P102	Keep out of reach of children
P30	3+361+353:	IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water
P30!	5+351+338:	IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing

Trad	le N	lame:	
		unic.	

.2 Label elem	ents
Labelling a	ccording to Regulation (EC) No 1272/2008
P401	Store in accordance with local/national/ international regulations
P501	Dispose of contents / container in accordance with local/national/international regulations

No other information is available

3. Composition/information on ingredients

3.1 Mixture

2.3 Other Hazards

 CAS No:
 EC No:

4. First Aid measures

4.1 Description of first aid me	easures
General Advice:	Take off all contaminated clothing immediately.
If inhaled:	Not normally applicable but as a precaution remove to fresh air and keep patient warm.
In case of skin contact:	Wash off immediately with plenty of soap & water. If irritation appears seek medical advice
In case of eye contact:	Rinse immediately with plenty of water, also under eyelids for at least 15 minutes. Remove contact lenses.
If swallowed:	Clean mouth with water and drink plenty of water. Never give anything by mouth to an unconscious person. If swallowed , do not induce vomiting - seek medical advice.
4.2 Most important symptom	is and effects, both acute and delayed
Symptoms & effects:	No further information available
4.3 Indication of immediate n	nedical attention and special treatment needed
Treatment	Treat symptomatically
	No further information available

5. Fire fighting measures

_	-	
	Extinguishing media: Suitable media:	Will not burn, use media appropriate for surrounding material.
	Special hazards arising fron Specific Hazards :	n the substance or mixture Thermal decomposition (>600°C) may liberate SO _x fumes.
	Advice for firefighters Protective equipment:	Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.
	Further Information:	Dispose of fire debris & contaminated fire fighting water in accordance with local regulations. Collect fire fighting water separately. it must not enter drains.

Accidental release Measures	
6.1 Personal precautions, prot Personal Precautions:	tective equipment and emergency procedures Use appropriate personal protective equipment as detailed in section 8.
6.2 Environmental precaution Environmental precautions	s :: Do not let product enter drains, contain the material and sweep up.
on ground	r containment and cleaning up I: Flush with plenty of water, if possible neutralise with lime. r: Inform police and/or fire brigade and appropriate authority
6.4 Reference to other sectior	 See Section 7 for information on safe handling See Section 8 for information on personal protection equipment See Section 13 for disposal information
Handling and storage	
7.1 Precautions for safe handl	ing
Advice on safe handling:	Ensure adequate ventilation. Use personal protective equipment. Avoid contact with skin and eyes. Emergency eye wash fountains and emergency showers should be available in the immediate vicinity. Do not mix with other products in their concentrated form.
Hygiene measures:	Keep away from food, drink and animal feeding stuffs. Smoking, eating and drinking should be prohibited in the application area. Wash hands before breaks and at the end of the work day. Take off all contaminated clothing immediately. Provide adequate ventilation. Avoid contact with the skin and eyes.
7.2 Conditions for safe storage	e, including any incompatabilities.
Storage : Fire and explosion: Further information:	Prevent any seepage into the ground No special measures required Store in cool, dry conditions in well sealed receptacles
Common storage: Storage Temperature:	Keep away from food, drink and animal feedstuffs. No further information available
7.3 Specific end uses	No information available

8. Exposure control/personal protection

8.1 Control parameters Aluminium Sulphate 8 hr TWA 2 mg/m^3 **Exposure controls** Engineering controls should be provided which maintain airborne concentrations as low as **Engineering measures** practicable Personal protective equipment No special ventilation requirements are normally necessary for this product. However, make Ventilation: sure that the work environment remains clean and that dusts are minimised. Respiratory protection In case of insufficient ventilation wear suitable respiratory equipment. Wear protective gloves. The selected protective gloves have to satisfy the specifications of EU Directive Hand protection 89/686/EEC and standard EN 374. Eye protection Tightly fitting safety goggles (EN166) Skin and body protection: Acid resistant protective clothing **Environmental exposure controls** General advice: Do not flush into surface water or sanitary sewer systems. Avoid subsoil penetration. Page 3 of 6

9.1 Information on basic phy	vsical and chemical properties
Form:	Solid
Colour:	White
Odour:	Insignificant
рН @ 20 [°] С:	N/A
Melting point:	770ºC
Boiling point:	N/A
Flash point:	N/A
Density @ 20°C:	1690
Water solubility:	Fully miscible
9.2 Other Information	No further information available
10.1 Reactivity	
ability and reactivity 10.1 Reactivity Reactivity	Avoid contact with chlorite/hypochlorite/sulphite/oxidising agents & cyanides.
10.1 Reactivity	Avoid contact with chlorite/hypochlorite/sulphite/oxidising agents & cyanides.
10.1 Reactivity Reactivity	Avoid contact with chlorite/hypochlorite/sulphite/oxidising agents & cyanides. No decomposition if stored and applied as directed
 10.1 Reactivity Reactivity 10.2 Chemical stability Chemical stability 	No decomposition if stored and applied as directed
 10.1 Reactivity Reactivity 10.2 Chemical stability Chemical stability 	No decomposition if stored and applied as directed
 10.1 Reactivity Reactivity 10.2 Chemical stability Chemical stability 10.3 Possibility of hazardous 	No decomposition if stored and applied as directed
 10.1 Reactivity Reactivity 10.2 Chemical stability Chemical stability 10.3 Possibility of hazardous Hazardous reactions 	No decomposition if stored and applied as directed
 10.1 Reactivity Reactivity 10.2 Chemical stability Chemical stability 10.3 Possibility of hazardous Hazardous reactions 10.4 Conditions to avoid 	No decomposition if stored and applied as directed reactions Thermal decomposition (>600°C) may liberate SO _x fumes.

11. Toxicilogical Information

11.1 Information on toxicilogical effects

Toxicity Values

Aluminium Sulphate				
Route	Species	Test	Value	Units
Oral	Rat	LD50	>5,000	mg/kg
Intrapetrioneal	Mouse	LD50	6,207	mg/kg

Primary Irritant effect

On the skin: Causes skin irritation and soreness On the eye: Causes severe eye irritation.

CarcinogenicThere is no evidence that this substance has any carcinogenic properties.MutagenicThere is no evidence that this substance is mutagenicSensitization:No sensitizing effects known

Additional toxicological information:

If ingested The ingestion of significant quantities may cause nausea/vomiting **If inhaled** Irritating to mucous membranes and upper respiratory tract.

12.1 Toxicity	
Toxicity	Expected to be harmful
12.2 Persistence and degradab	pility
Persistence and degradability	ty No data available
12.3 Bioaccumlative potential	
Bioaccumlative potential	No data available
12.4 Mobility in soil	
Mobility in soil	No data available
12.5 Results of PBT and PvB as	sessment
Results of PBT and PvB	No data available
12.6 Other adverse effects	
On contact with water, alu hydroxide.	uminium sulphate will hydrolyse to give dilute sulphuric acid and gelatinous aluminium
·	nvironment should be avoided since it may lead to localised adverse effects arising fr

Discharge to the aquatic environment should be avoided since it may lead to localised adverse effects arising from the products physical properties. The clogging of tentacles, gills and filters of suspension feeders and the modification of the photosynthesis of algae and plankton may result from the presence of suspended particles and turbidity.

The product is an inorganic substance/preparation. During hydrolisation, a precepate is formed of metal hydroxide in the pH range 5 to 7. Due to this reaction the pH in the water phase decreases, If phosphates are present, metal phosphate complex may form.

13. Disposal Considerations

13.1 Waste treatment methods

Disposal should be in accordance with local, state or national legislation Do not reuse empty containers without commercial cleaning or reconditioning Do not discharge into drains or the environment, dispose to an authorised waste collection point

Classification

Waste Codes in accordance with the European Waste catalogue (EWC) are origin-defined. Since this product is used in several industries, no Waste Code can be provided by the supplier. The Waste Code should be determined in arrangement with your waste disposal partner or the responsible authority

14. Transport Information

ninor leaks or spills if possible without unnecessary risk
r /

15. Regulatory information

- **15.1 Safety, health and environmental regulations/legislation specific for this substance or mixture.** This Safety Data Sheet is provided in compliance with REACH Regulation (EC) No 1907/2006
- 15.2 Chemical Safety Assessment

No further information

16. Other information

Full text of H-statements referred to under sections 2 and 3H315Causes skin irritationH319Causes serious eye irritationH335May cause respiratory irritation

Further information

Restricted to professional users. Attention - Avoid exposure- obtain special instructions before use
