		bursting.Collect contaminated fire extinguishing water separately. This must not be discharged into drains.	
SEC	TION 6: Accidental release	e measures	
6.1.	Personal precautions, prote	ective equipment and emergency procedures	
	Personal precautions	: Use personal protective equipment. Wear respiratory protection. Keep away unprotected persons. Provide adequate ventilation. Danger of slipping if spilled Avoid contact with skin, eyes and clothing. Do not breathe vapour.	
6.2.	Environmental precautions		
	Environmental precautions	: Do not flush into surface water or sanitary sewer system. Avoid subsoil penetration. If the product contaminates rivers and lakes or drains inform respective authorities. If material reaches soil inform authorities responsible for such cases.	
6.3.	Methods and materials for	containment and cleaning up	
	Methods and materials for containment and cleaning up	: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders). Keep in suitable, closed containers for disposal. Do not keep the container sealed.	
	Further information	: Treat recovered material as described in the section "Disposal considerations".	
6.4.	Reference to other sections	5	
	See Section 1 for emergence See Section 8 for information See Section 13 for waste tree	n on personal protective equipment.	
SEC	TION 7: Handling and stor	age	
7.1.	Precautions for safe handli	ng	
	Advice on safe handling	: Do not keep the container sealed. Handle and open container with care. Ensure adequate ventilation. Use personal protective equipment. Avoid contact with the skin and the eyes. Do not breathe vapours or spray mist. Use respirator with appropriate filter if vapours or aerosol are released. Emergency eye wash fountains and emergency showers should be available in the immediate vicinity.	
	Hygiene measures	: Keep away from food, drink and animal feedingstuffs. Smoking, eating and drinking should be prohibited in the application area. Wash hands before breaks and at the end of workday. Take off all contaminated clothing immediately.	
7.2.	Conditions for safe storage	e, including any incompatibilities

Refer to protective mea	asures listed in sections 7 and 8.
Personal protective e	quipment
Respiratory protection	1
Advice	 Use respirator with appropriate filter if vapours or aerosol are released. Respiratory protection complying with EN 141. Recommended Filter type: Combination filter:B-P2 Combination filter:B-P3 In case of intensive or longer exposure use self-contained breathing apparatus.
Hand protection	
Advice	 Protective gloves complying with EN 374. The glove material has to be impermeable and resistant to the product / the substance / the preparation. Take note of the information given by the producer concerning permeability and break through times, and of special workplace conditions (mechanical strain, duration of contact). Protective gloves should be replaced at first signs of wear.
Material Break through time Glove thickness	: butyl-rubber : 8 h : 0.5 mm
Material Break through time Glove thickness	 Polyvinylchloride 8 h 0.5 mm
Material Break through time Glove thickness	: polychloroprene : 8 h : 0.5 mm
Eye protection	
Advice	 Tightly fitting safety goggles Ensure that eyewash stations and safety showers are close to the workstation location.
Skin and body protec	tion
Advice	 Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work- place. Wear appropriate chemical resistant clothing and boots. alkali resistant protective clothing
Environmental expos	ure controls

Key literature references : and sources for data	Supplier information and data from the "Database of registered substances" of the European Chemicals Agency (ECHA) were used to create this safety data sheet.		
Methods used for : product classification	The classification for human health, physical and chemical hazards and environmental hazards were derived from a combination of calculation methods and if available test data.		
Hints for trainings :	The workers have to be trained regularly on the safe handling of the products based on the information provided in the Safety Data Sheet and the local conditions of the workplace. National regulations for the training of workers in the handling of hazardous materials must be adhered to.

1. Short title of Exposure Sc	enario 9: Industrial use		
Main User Groups	SU 3: Industrial uses: Uses sites	s of substances as such or in preparations at industrial	
Sectors of end-use	SU4: Manufacture of food products SU5: Manufacture of textiles, leather, fur SU6a: Manufacture of wood and wood products SU6b: Manufacture of pulp, paper and paper products SU8: Manufacture of bulk, large scale chemicals (including petroleum products) SU9: Manufacture of fine chemicals SU 10: Formulation [mixing] of preparations and/ or re-packaging (excluding alloys) SU11: Manufacture of rubber products		
Process categories	exposure or processes with PROC2: Use in closed, con PROC3: Manufacture or for processes with occasional containment condition PROC4: Use in batch and exposure arises PROC5: Mixing or blending and articles (multistage and PROC8a: Transfer of subs vessels/ large containers at PROC8b: Transfer of subst vessels/ large containers at PROC9: Transfer of subst filling line, including weighir PROC13: Treatment of art PROC14: Production of pre extrusion, pelletisation	tance or preparation (charging/ discharging) from/ to c non-dedicated facilities tance or preparation (charging/ discharging) from/ to c dedicated facilities ance or preparation into small containers (dedicated ng) icles by dipping and pouring eparations or articles by tabletting, compression,	
Environmental Release Categories	ERC6a: Industrial use resulting in manufacture of another substance (use of intermediates) ERC6b: Industrial use of reactive processing aids ERC6d: Industrial use of process regulators for polymerisation processes in production of resins, rubbers, polymers		
Activity	Note: this Exposure Scenario is only relevant for an appropriated use according to the quality grade of the substance delivered		
2.1 Contributing scenario co	ontrolling environmental	exposure for: ERC6a, ERC6b, ERC6d	
Substance is a unique structur , Low potential to bioaccumula			
Product characteristics	Concentration of the Substance in Mixture/Article	Concentration of substance in product : 0% - 15%	
Amount used	Amounts used in the EU (tonnes/year)	999999 ton(s)/year	
Frequency and duration of use	Continuous exposure	360 days/year	
Environment factors not	Flow rate of receiving surface water	18,000 m3/d	
influenced by risk management	Dilution Factor (River) Dilution Factor (Coastal	10 100	
Technical conditions and measures at process level to	Areas) Air	Substance release to air can be excluded	
	l		
70000000233 / Version 11.0) 47/52	EN	

prevent release Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil Organizational measures to	Water	Risk from environmental exposure is driven by freshwater., Do not release wastewater directly into environment., Onsite wastewater treatment required, No discharge of substance into waste water Substance release to soil can be excluded		
prevent/limit release from the site	Soil	Substance release to soil can be excluded		
Conditions and measures related	Type of Sewage Treatment Plant	Municipal sewage treatment plant		
to sewage treatment plant	Flow rate of sewage treatment plant effluent	2,000 m3/d		
Conditions and measures related to external treatment of waste for disposal	Waste treatmentExternal treatment and disposal of waste comply with applicable local and/or natio regulations.			
2.2 Contributing scenario co PROC5, PROC8a, PROC8		re for: PROC1, PROC2, PROC3, PROC4, OC14		
	Concentration of the Substance in Mixture/Article	Concentration of substance in product : 0% - 15%		
Product characteristics	Physical Form (at time of use)	Liquid, moderate fugacity		
	Vapour pressure	25 hPa		
	Process Temperature	90 °C		
Frequency and duration of use	Exposure duration per day	8 h		
	Frequency of use	5 days/week		
Other operational conditions	Indoor or outdoor use			
affecting workers exposure	Assumes activities are at a	mbient temperature.		
Technical conditions and measures to control dispersion from source towards the worker	Provide a good standard of general ventilation (not less than 3 to 5 air changes per hour). Drain down system prior to equipment opening or maintenance.			
Organisational measures to prevent /limit releases, dispersion and exposure	Ensure that no inhalable aerosols are generated Regular inspection and maintenance of equipment and machines. Ensure that the task is not carried out overhead. Ensure containment of the emission source			
Conditions and measures related to personal protection, hygiene and health evaluation	Wear protective gloves/ protective clothing/ eye protection/ face protection. In case of odour, gas alarm or insufficient ventilation wear suitable respiratory protection In the case of hazardous fumes, wear self contained breathing apparatus.			
Risk management measures are b	ased on qualitative risk char	acterisation.		
2.3 Contributing scenario co	ntrolling worker exposu	re for: PROC8a, PROC8b, PROC9		
	Concentration of the Substance in Mixture/Article	Concentration of substance in product : 0% - 5%		
Product characteristics	Physical Form (at time of use)	Liquid, moderate fugacity		
	Vapour pressure	25 hPa		
	Process Temperature	90 °C		
Frequency and duration of use	Exposure duration per day	8 h		
	Frequency of use	5 days/week		
Human factors not influenced by risk management	Exposed skin area Two hands 820 cm ²

1. Short title of Exposure Sco	enario 10: Consumer us	e			
Main User Groups	SU 21: Consumer uses: Pr	ivate households (= general public = consumers)			
Chemical product category	PC34: Textile dyes, finishing and impregnating products; including bleaches and other processing aids PC35: Washing and cleaning products PC37: Water treatment chemicals				
Environmental Release Categories	ERC8a: Wide dispersive indoor use of processing aids in open systems ERC8b: Wide dispersive indoor use of reactive substances in open systems ERC8d: Wide dispersive outdoor use of processing aids in open systems ERC8e: Wide dispersive outdoor use of reactive substances in open systems				
2.1 Contributing scenario co	ntrolling environmental	exposure for: ERC8a, ERC8b, ERC8d, ERC8e			
Substance is a unique structure, Low potential to bioaccumula					
Product characteristics	Concentration of the Substance in Mixture/Article	Concentration of substance in product : 0% - 10%			
Amount used	Amounts used in the EU (tonnes/year)	999999 ton(s)/year			
Frequency and duration of use	Continuous exposure	360 days/year			
	Flow rate of receiving surface water	18,000 m3/d			
Environment factors not influenced by risk management	Dilution Factor (River)	10			
initiation of a second s	Dilution Factor (Coastal Areas)	100			
Technical conditions and	Air	Substance release to air can be excluded			
measures at process level to prevent release Technical onsite conditions and measures to reduce or limit discharges, air emissions and releases to soil	Water	Risk from environmental exposure is driven by freshwater., Do not release wastewater directly into environment., Onsite wastewater treatment required, No discharge of substance into waste water			
Organizational measures to prevent/limit release from the site					
Conditions and measures related	Type of Sewage Treatment Plant	Municipal sewage treatment plant			
to sewage treatment plant	Flow rate of sewage treatment plant effluent	2,000 m3/d			
Conditions and measures related to external treatment of waste for disposal	Waste treatment	External treatment and disposal of waste should comply with applicable local and/or national regulations.			
2.2 Contributing scenario co purpose cleaners, sanita		osure for: PC35: Cleaners, trigger sprays (all ners)			
	Concentration of the Substance in Mixture/Article	Concentration of substance in product: 0% - 3%			
Product characteristics	Physical Form (at time of use)	Liquid, moderate fugacity			
	Vapour pressure	25 hPa			
Amount used	Amount used per event	0.005 kg			
	Exposure duration	7.5 min			
Frequency and duration of use	Frequency of use	4 Times per day			
700000000233 / Version 11.0	50/52	EN			

	Indoor use	
Other given operational conditions affecting consumers	Room size	4 m3
exposure	Ventilation rate per hour	0.5
2.3 Contributing scenario co		
2.5 Contributing Scenario Co	Concentration of the	
	Substance in Mixture/Article	Concentration of substance in product: 0% - 0,5%
Product characteristics	Physical Form (at time of use)	Liquid, moderate fugacity
	Vapour pressure	25 hPa
Frequency and duration of use	Frequency of use	1 Times per day
Human factors not influenced by risk management	Exposed skin area	Palm of one Hand 420 cm ²
Other given operational	Indoor use	-
conditions affecting consumers	Room size	4 m3
exposure	Ventilation rate per hour	0.5
Conditions and measures related to protection of consumer (e.g. behavioural advice, personal protection and hygiene)	Consumer Measures	Wear impervious chemical resistant protective gloves.
2.4 Contributing scenario co	ntrolling consumer expo	osure for: PC34
	Concentration of the Substance in Mixture/Article	Concentration of substance in product: 0% - 0.05%
Product characteristics	Physical Form (at time of use)	Liquid, moderate fugacity
	Vapour pressure	25 hPa
Frequency and duration of use	Frequency of use 2 days/week	
Human factors not influenced by risk management	Exposed skin area	Two hands 820 cm ²
Other given operational	Indoor use	
conditions affecting consumers	Room size	4 m3
exposure	Ventilation rate per hour	0.5
Conditions and measures related to protection of consumer (e.g. behavioural advice, personal protection and hygiene)	Consumer Measures	Wear impervious chemical resistant protective gloves.
2.5 Contributing scenario co	ntrolling consumer expo	osure for: PC37
	Concentration of the Substance in Mixture/Article	Concentration of substance in product: 0% - 0,1%
Product characteristics	Physical Form (at time of use)	Liquid, moderate fugacity
	Vapour pressure	25 hPa
Amount used		2000 mL
Frequency and duration of use	Frequency of use	1 Times per day
3. Exposure estimation and	reference to its source	
Environment		
	51/52	EN

SODIUM HYPOCHLORITE >=10 - <=15%

Qualitative approach used to conclude safe use.

Consumers

PC34, PC35: EU RAR

Contributing Scenario	Specific conditions	Exposure routes	Level of Exposure	RCR
PC34	Laundry bleaching/pre- treatment	Consumer - inhalative, long-term - systemic	1.68µg/m³	0.000108
PC35	Hard surface cleaning	Consumer - inhalative, long-term - systemic	1.68µg/m³	0.000108
PC34	Laundry bleaching/pre- treatment	Consumer - dermal, short-term - local	0.035mg/kg bw/day	< 1
PC35	Hard surface cleaning	Consumer - dermal, short-term - local	0.002mg/kg bw/day	< 1
	Drinking water, adult	Consumer oral, acute	0.0003mg/kg bw/day	
	Drinking water, adult	Consumer oral, long-term	0.003mg/kg bw/day	0.011
	Drinking water, children	Consumer oral, acute	0.0007mg/kg bw/day	
	Drinking water, children	Consumer oral, long-term	0.0033mg/kg bw/day	0.011

4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

Only properly trained persons shall make use of scaling methods while checking whether the OC and RMM are within the boundaries set by the ES
