

Affinity Portable Flexible AFT4/

The Affinity Portable Flexible is one of Affinity's original couches and, over 19 years on, due to its classic style and great value, is still one of the most versatile and best loved professional massage couches in the marketplace today.

As with all Affinity couches, the Portable Flexible is of a robust, strong construction and the 4-leg cable system means that the couch can be set up and ready for use in a matter of seconds.

The Portable Flexible offers generous levels of height adjustment which can be quickly altered due to the rubberised, easi-grip adjusters. The density of the frame, the wrap around design of the leg and the quality of wood mean that Affinity couches are exceptionally stable even at the upper ends of the height setting.

Affinity Portable Flexible features an 'easy lift' backrest which can be quickly and simply adjusted via a smooth ratchet system.

The reiki style end panels allow the therapist excellent access at either end of the couch, especially for seated treatments, and the Affinity superior comfort Therafoam padding ensures a well-supported and comfortable client even during longer treatments. The foam is covered with a luxurious feeling, but hard wearing, PU upholstery.

To further enhance client comfort, the Portable Flexible features the Affinity ergonomic breathe hole (which comes with plug) as well as our face cradle frame, cushion and hanging arm rest sling. An added benefit of using the face cradle frame is that you can use either end of the couch and spread the wear as well as offering extra comfort and more flexible positioning options for both therapist and client.

For your added convenience, the Portable Flexible comes with a wheeled carry case which makes it easy to transport to treatments whilst keeping it protected from the elements, knocks and scrapes. As you would expect with a leading brand, even the carry case has therapist friendly features, with a large accessory pocket, metal zips and fixings and extra carry handles to ensure posture friendly carrying.

All in all, the Affinity Portable Flexible is a super couch that will give you great flexibility in the treatments you offer and happily work with you to offer a great treatment experience.
