

Affinity Marlin

AFALU4/N/W

The Affinity Marlin was originally designed to offer a great quality, exceptionally strong, portable couch for the sports massage/physical therapy markets. Fast forward nearly 19 years and the Affinity Marlin is not only a leading couch in the sports/physical therapy sector, but is also a firm favourite with beauty and holistic therapists that are looking for a couch strong enough to treat a multitude of body shapes and sizes, flexible enough to be used for different treatment types but still offering great portability.

Due to clever design, our Marlin is a truly portable, board mattress table at just a fraction over 14.5kgs. With its rapid set up and easy, one-touch height control, the Affinity Marlin can be used and taken to the next appointment with the minimum of strain and difficulty for the mobile therapist. A slimline but strong table featuring 4 leg cable system making it ideal for sports massage, mobile beauty treatments and, with an impressive maximum user weight, accommodating large clients without fuss.

Upholstered in a highly durable PVC and filled with a sports grade foam, you can be sure that the Marlin will offer a great level of client comfort during treatment but will also offer the therapist great feedback during massage.

As with all Affinity couches, the Marlin is fully height adjustable with telescopic legs that can be quickly and easily adjusted through a generous height range. A great, and seemingly unique, feature of the Marlin's aluminium frame design is its stability when used at the upper levels of the height adjustment. Should you need extra length, or simply prefer the extra positioning flexibility offered by the face cradle frame, the Marlin can be quickly and easily upgraded by adding the Affinity Power Therapist Upgrade Pack (face cradle & arm rest).

Sleek lines and versatility mean the Marlin has established itself as a favourite for sports therapists, mobile massage and beauty therapists alike.

KEY POINTS:

- Extremely comfortable
- Lifting back rest
- Therafoam sports padding
- Tough, PVC upholstery
- Truly portable
- Excellent stability, even at highest settings
- Great strength
- Reiki end panels
- Rapid set up

- Generous height adjustment
- Affinity ergonomic breathe hole and plug
- Quality carry case included
- Port holes either end for paper towel/face cradle frame
- Non-slip feet
- Soft touch carry handle
- Quality construction
- Strong aluminium frame

Power Therapist Upgrade Pack:

For the therapist that is regularly treating very tall clients or simply prefers the positioning options provided by a face cradle frame, the Affinity Marlin can be quickly and easily upgraded with the addition of the Affinity Power Therapist Upgrade Pack. The pack includes a face cradle frame, cradle cushion and hanging arm rest.
