

Affinity Versalite (28")

AFVERSA28/N

The 28" Affinity Versalite offers all the features of the 25" Versalite whilst offering an extra 3" of width. The extra width makes the Versalite more suitable for those offering holistic therapy or treatments where you might need the extra width to mount the couch during treatment.

This highly practical couch features the ergonomic Affinity shaped breathe hole, rounded corners and port holes in either end. Should you decide to add the Power Therapist upgrade pack to the couch, the dual end port holes will not only allow you to use the face cradle and paper towel holder at the same time but they will also allow for face cradle insertion either end to even out couch wear.

To maximise client comfort, Affinity's durable, Therafoam comfort padding is upholstered with luxurious, soft touch PU which is both tear and stain resistant.

The Affinity Versalite couch features generous, easy height adjustment via the one touch, spring back push button system. A top feature of this couch is the ability to close it without having to shorten the legs.

As with all Affinity portable couches, a quality carry case featuring a large front storage pocket, metal zips and fixings and posture friendly carry handles, is included as standard. Our cases have been designed for carrying rather than just covering and the carry handles have all been strategically placed to ensure 'best posture' whilst couch carrying.

For extra portability, this couch also comes in a 25" inch option.

Key Features:

- Light weight
- Therafoam comfort padding
- Luxury feel PU upholstery
- Strong aluminium frame
- Quality construction
- Affinity ergonomic breathe-hole and bung
