

Chlorilong® ULTIMATE 7 Bloc copper sulfate free

Chlorilong® ULTIMATE 7 Bloc is a 7 function chlorine tablet for the complete and continuous removal of impurities from the pool water.
Contains anti algae granules.

Use

7 function chlorine tablet disinfection.

Product description

7 functions:

- Removal of impurities
- Anti algae
- Clarifier
- Anti scale
- Chlorine stabilizer
- Shock treatment chlorination
- Filter shock action

1 cartridge (950g) contains 3 slow-dissolving chlorine tablets
+ 1 fast-dissolving chlorine tablet + anti algae granules.

Dosing/instructions for use

The Chlorilong® ULTIMATE 7 bloc is applicable for a 30 - 50 m³ pool and lasts for about 2 weeks. Only to use with sand filters.

Backwash first, then open the cartridge turning the dosing slots. Place it directly and upright in the skimmer with filtration on. Then let the filtration run during at least 4 hours. The cartridge must be immersed in the water (at least up to where the dosing slots are located). This part must be adjusted to ensure an ideal chlorine rate of 0.5 to 1mg/L (*The dissolution speed may vary and is highly dependent on pump running time and water temperature).
BAYROL advice: Before adding Chlorilong® ULTIMATE 7 bloc, carry out a shock chlorination (with Chloriklar® or Chlorifx) and in case of algae in the water, add Desalgine® or Desalgine® Jet.

Important note: Never apply Chlorilong® ULTIMATE 7 Bloc directly into the pool to prevent bleaching spots. Avoid direct contact with non-chlorine resistant materials. Before any addition of Chlorilong® ULTIMATE 7 Bloc, backwash the sand filter.

Ref: 5599193
Weight: 3,8 kg (4 cartridges x 950g)

Product benefits:

- 1 THE most-advanced and complete pool water treatment
- 2 A.P.O.® technology guarantees a uniform amount of chlorine during the dissolution period
- 3 Up to 2 weeks water treatment
- 4 Strong anti algae protection
- 5 Do not contain copper sulfate (will not cause damage to the pool surface)

Comfort Care
