

Blue Horizons Flockfix Cartridges

Key Features

- Slow-release floc cartridge
- Improves filter efficiency, restoring water clarity
- Aids in the removal of metals

Blue Horizons Flockfix Cartridges are designed to assist the filter in removing small, suspended particles to ensure sparkling, clear water. They can also help remove copper, iron and manganese from pool water.

Application Instructions

1. Maintain pH levels within the ideal range of 7.2 – 7.6. Adjust if necessary.
2. Maintain total alkalinity within the ideal range of 80 – 150mg/l. Adjust if necessary.
3. Maintain free chlorine levels within the ideal range of 1 – 3mg/l. Adjust if necessary.
4. Backwash the filter, then return to normal filter cycle.
5. Ensure the skimmer basket is clean and free of any other chemicals.
6. Add 1 cartridge to the skimmer basket per 50,000 litres (11,000 gallons) of pool water per week.
