

Blue Horizons

JellyCLEAR Cubes

Key Features

- Improves filter efficiency, restoring water clarity
- Suitable for sand and cartridge filters
- Lasts for up to 2 weeks

Application Instructions

1. If algae are present, ensure they are pre-treated (brush algae to release from pool walls), prior to using JellyCLEAR Cubes. Maintain pH levels within the ideal range of 7.2 – 7.6. If not in this range, adjust.
2. Backwash the filter (or clean cartridge filter), then return to normal filtration setting.
3. Peel off the protective plastic film and add the JellyCLEAR Cube(s) into a clean and empty skimmer basket.
4. JellyCLEAR Cubes will dissolve over a period of 3 – 4 days depending on water flow from the filtration cycle. However, JellyCLEAR Cubes have a long-lasting effect beyond their disappearance.

| Litres | Gallons | Dose rates |
|------------------|-----------------|------------|
| Under 50,000 | 11,000 | 1 cube |
| 50,000 – 100,000 | 11,000 – 22,000 | 2 cubes |

Note: Always ensure that the skimmer basket is clean and free of debris whilst the JellyCLEAR Cubes are dissolving.
