

Affinity Powerlift

A slightly wider than standard couch (29"), the Affinity Powerlift comes with all the quality fittings and features that have become synonymous with Affinity brand.

If you are looking for a strong, reliable, comfortable and aesthetic couch for your therapy/treatment centre, then look no further than the Affinity Powerlift. Currently being used in nutrition centres, gyms, premiership football clubs, hospices and therapy centres across the UK, the Affinity Powerlift is an incredibly versatile, 2-part electric couch that will suit most therapy needs.

Its sturdy, powerlift base has 4 easy-roll castors which enables the couch to be moved if required. To ensure the couch is secure and properly positioned at all times, each wheel can be locked into position.

The Powerlift offers great levels of height adjustment which can be quickly and quietly altered by way of a foot pedal. The back rest is operated manually and can be fixed at any angle up to 90°, thus allowing you complete flexibility in all your treatments.

Further enhancing client comfort are the Affinity ergonomic breathe hole, which comes with bung and the double articulating face cradle frame, cushion and hanging arm rest and the incredibly comfortable Therafoam padding ensures your clients have the most comfortable experience possible, even during those longer and more challenging sessions.

The Affinity Powerlift is a great allrounder and sound long-term investment for your therapy business.
