

Affinity Sports Pro

The Affinity Sports Pro is an absolute power house of a couch, designed predominantly with the sports/physio market in mind. This beautiful, sleek, robust, electric massage plinth is a great allrounder and 'must have', long-term investment for your clinic or treatment centre.

As with all Affinity couches, the Sports Pro is packed with features that ensure a great treatment experience for both client and therapist alike.

Its sturdy, powerlift base features 4 easy-roll, rotating castors which allows the couch to be easily moved. Each wheel can be locked into position to ensure the couch is secure and properly positioned at all times.

The Sports Pro offers great levels of height adjustment which can be quickly, and quietly, altered by way of a foot pedal. In terms of positioning the couch top, the back rest and lower leg section are manually operated enabling the couch to be used completely flat through to chair position thus allowing you complete flexibility in all your treatments.

Further enhancing client comfort, not to mention offering more flexible positioning for the therapist, is the Affinity ergonomic breathe hole, which comes with plug and the double articulating face cradle frame, contoured cushion and hanging arm rest. Another feature is the firm but incredibly comfortable, sports grade Therafoam which not only ensures great feedback during massage, but also that your clients have the most comfortable experience possible, even during those longer and more challenging sessions.

KEY FEATURES:

- Great massage feedback
- Excellent client comfort
- Therafoam sports padding
