

# Glass Pool Fencing

Beautifully designed frameless glass fencing installed by dedicated and professional specialists.

No drama, no fuss, no shortcuts - just quality executed to perfection.

Our fencing can be used for pool safety, wind protection, fall prevention and whilst adding a quality architectural feel, your view is completely unobstructed.

# Pool safety

There are currently no safety regulations for private pools in the UK, even though many under 5's are either injured or worse every year.

However we install our fences to the strict French safety regulation NF P90-306 for maximum security and peace of mind.

Some approved safety devices such as covers need to be 'closed' before they become effective and some devices require your child or animal to fall in the water before an alarm is set off. Our fences prevent access - period!

We do believe that educating children is as important as restricting pool access, so please do research self help techniques with [www.thejackrabbitfoundation.com](http://www.thejackrabbitfoundation.com)

# Installation

The glass is held by marine grade stainless steel legs (A316l s/s) made just for us. These are bonded up to 150mm underground, in a hole that we cut into your patio, pool surround or wall.

With some additional construction, we can also install fences into wooden decking and soil.

The hinges we use for the self-closing & self latching gates are also made from A316l s/s, as is the latch mechanism. We have recently introduced a key operated lock to this latch too.

“We found Ammonite very professional and communicative throughout and we are more than happy with the beautiful finished result!”

*Pete - Beaconsfield, Bucks.*

“A stroke of genius - practical, beautiful and we love it! The glass fencing and the Jack Rabbit Foundation will be life-savers.”

*Ash - Abinger Common*

“We can't help admiring our glass pool fence every time we look out into our garden! We were very impressed with Ammonite's professionalism throughout the design and installation and we enjoyed spending time with a company who take real pride in installing their unique and beautiful product.”

*Annette - Berkhamstead*
