Gold Horizons Powder Filter Cleaner

Key Features/Characteristics

- 🔑 Dual action cartridge cleaner
- 🔑 Powder for easy application
- 🔑 Measuring spoon included

For cartridge filter cleaning and removal of scale

Application Instructions

1. Measure 100g of Gold Horizons Powder Filter Cleaner using the enclosed 10ml measuring spoon (a level spoon = approx. 10g) into a clean bucket containing up to 4 gallons (18 litres) of clean warm water. Stir to dissolve.
2. Hose off any loose debris from the cartridge and place the dirty cartridge into the cleaning solution, ensuring the cartridge is completely submerged. Leave to soak overnight.
3. Clean and rinse the cartridge with plenty of fresh water.
4. For best results allow the cartridge to dry before re-installing.

Important: When dosing this product, wear eye and face protection and ensure granules are not blown back towards you.
