NOVA

STEAM COLUMN

Harvia Nova steam column is the universal solution which makes steam bathing possible in any shower cabin. The body of the steam column includes: steam generator, overhead and handheld shower, temperature and water flow knobs.

In addition to all the above, the Nova steam shower column also comes with built-in water filter cartridge to ensure clean and pure water for the steam generator, making this truly an all-in-one solution with every small detail covered. Distinct and simple Nordic design is guaranteed to add a touch of luxury and modern appeal to any shower cabin where it is installed.

- Fast operation, with visible steam in under 2 minutes
- All electronics cleverly integrated inside the steam column
- Elegant steam nozzle with recessed cup design for adding steam scents
- Built-in support for MyHarvia WiFi
- Hidden space for optional water filter cartridge
