

Corner Step Unit Installation Guide

Step One

Place the 1st unit flush with two edges of the pool, and seal to pool walls with CT1 Sealant provided with delivery

Step Two.

Place the left side bottom step unit flush with one edge of the pool wall and one edge of the first stair unit, fixing with CT1.

Corner Step Unit Installation Guide

Step Three

Place the third unit flush with the opposing wall and hard up against the step units already in place. Affix units to one another with CT1

Step Four (Optional)

Once the units are in place securely and sealed, you can add a bead of silicon to joints between units
