

Affinity Stellar

AFSTELLAR/

Designed predominantly with the beauty/tattoo sectors in mind, our Affinity Stellar is a feature packed, high quality hydraulic beauty chair that will look incredibly stylish in your salon, tattoo studio or clinic.

With its generous proportions, luxurious Therafoam padding, couch top tilt and smooth, seamless operation, it will give your clients a really great experience, especially on those longer treatments.

Stellar's top features 4" comfort Therafoam padding, with each panel upholstered in a high quality, durable PU leather. The head cushion doubles up as a breathe hole plug so for supine treatments or tattoo sessions, the client can comfortably lay face down. The 2 side arm rests can be removed to allow for easy access but whilst on the chair they enhance the comfort and help to make the client feel really secure and supported. The leg sections can be independently dropped as well as featuring extendable end panels. For flexible, convenient positioning the chair top can rotate through 360°, there is also the function to tilt the top through 0-15° which takes comfort to a whole new level for those longer treatments.

The main chair lift is via a hydraulic central column operated by a foot bar. Gently pumping the foot bar will raise the couch. Once at the desired height the chair can be quickly and easily locked into position. The backrest and leg sections are operated by gas pistons and can also be very easily locked into the required position.

The strong steel base ensures great stability during use to ensure the client feels safe and secure during treatment which in turn means you can totally focus on your treating.
