

# Affinity Comfortflex

## AFCFLEX3/

---

The luxurious Affinity Comfortflex massage table has the versatility to be used for nearly every therapy/treatment, in any setting. Ideal either as a stationary couch in a clinic or a sturdy portable, the Comfortflex has all the features of a spa couch while offering the benefits of being portable.

Comfort by name, comfort by nature, the Affinity Comfortflex features sumptuous Therafoam comfort padding and soft-touch PU upholstery. To further enhance client, experience the Comfortflex comes with the Affinity ergonomic breath hole and plug as well as a face cradle frame with cushion and hanging arm rest.

Reiki end panels on the Affinity Comfortflex make it ideal for seated treatments, allowing a therapist to put their knees right under the massage table. The included face cradle and arm rest means clients benefit from the 12 inch longer table whilst the therapist benefits from more flexible positioning and better access to the neck and shoulders. For added comfort and flexibility, the backrest can be raised and is adjustable through 10 positions. To ensure that the therapist can work at the appropriate height for the treatment, the Comfortflex is also fully height adjustable using one, rubberised, easi-grip adjuster.

As with all Affinity couches, strength and stability is a key feature and to ensure no untimely creaks and squeaks, especially when the therapist is also on the couch, our frames are crafted by carpenters out of quality, furniture grade, beech wood.

To ensure its 'portable' status, the Affinity ComfortFlex comes with its own custom wheeled carry case, which makes this very smart therapy table the ideal solution for the mobile therapist and spa therapist alike.
