

Affinity Deluxe

AFDLX2/

Uncompromising quality and a host of innovative features make the Affinity Deluxe the premier portable solution for the discerning professional therapist.

As you would expect from an Affinity couch, the Deluxe features luxurious Affinity Therafoam comfort padding, soft touch PU upholstery and ergonomic design, thus reaching exceptional levels in both client and therapist comfort.

The double articulating face cradle frame is beautifully engineered and incredibly strong. On top of that sits the contoured face cushion which has been shaped to ensure maximum comfort for the prone client. With port holes either end of the couch, the face cradle can be inserted either end to ensure even couch wear.

Affinity Deluxe is regularly used for therapies where the therapist is on board with the client. The strong, reinforced board mattress, coupled with professionally crafted, hardwood frame, ensures no disconcerting couch noises whilst in use.

This beautiful, feature packed, couch ensures you have all the tools you need to provide the optimum treatment experience that will make you want to treat all day and keep your clients coming back for more.
