Espa Counter Current System

Easy Installation

As standard the Espa Counter Current System comes with metric pipe fittings and includes two isolating ball valves. We recommend that the plumbing kit is ordered; this provides the flexible pipe and fittings required to install the unit in the most compact fashion. You will also need a good PVC to ABS cement such as Wet 'R' Dry (PPF135).

For convenience the Espa Counter Current system is split into two pump sizes, a front jet kit which can be purchased separately and a plumbing kit. It is a high performance unit at a very competitive price:

- Directional outlet nozzle
- Adjustable water flow rate
- Adjustable air/water mix
- Self priming upto 4m
- One kit for liner or concrete pools
- Operated by air switch from inside the pool
- Pump can be installed upto 3m away from pool on 63mm pipework as per installation kit supplied or further if upgraded to 75mm

Plumbing Kit Contains

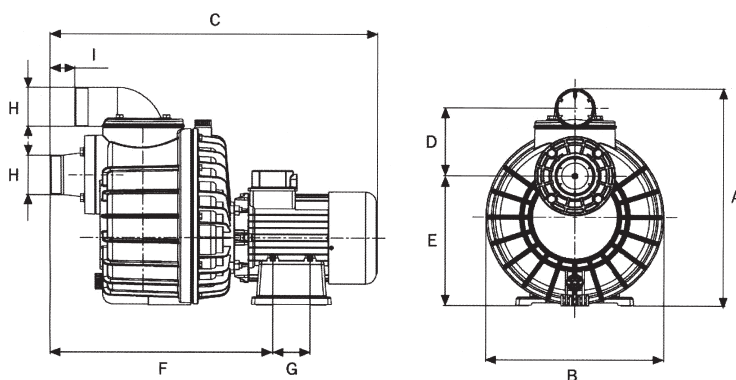

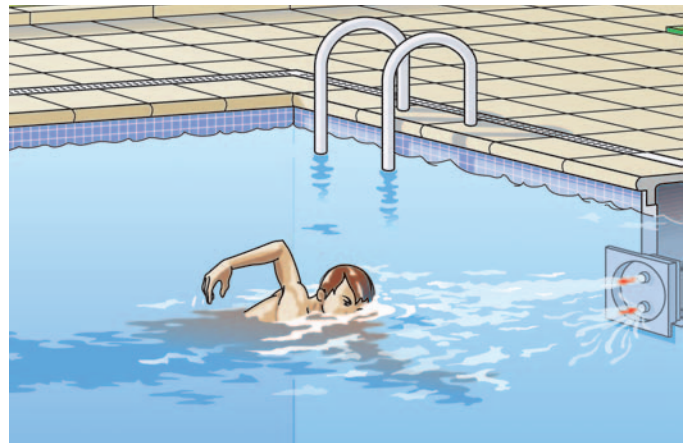

- 2 x 75mm female threaded plain socket
- 2 x 75mm to 63mm reducing bushes
- 2 x 63mm d/u Ball Valve
- 2 x 3m 63mm flexible pipe

Powerful Performance

The Espa Counter Current Nadorsel pump gives very good flow rates to challenge all levels of swimmers:

- Single phase pump: 3hp (2.3kW) provides 60m³/h
- Three phase pump: 4hp (3.0kW) provides 70m³/h

For a complete installation you will need one pump, one front jet and one plumbing kit

Dimensions (mm)	A	B	C	D	E	F	G	H	I	Weight Kg
