

Range of portable and semi-fixed pool lifts for transferring the disabled and infirm to and from pools, spas and hot-tubs.

DDA (Disability Discrimination Act) compliant, the lifts are suitable for commercial or multi-pool facilities where disabled access is required.

Portable Aquatic Lift (PAL)

Information

PAL - Portable Aquatic Lift

A portable powered lift that does not require mounting to the pool deck or the need for a water or electric supply. It can be positioned anywhere around the pool and put away when not in use.

Features

Completely portable: The unique versatility of the PAL makes it the ideal solution to the problem of access for the disabled or the infirm who would like to use commercial or multi-pool facilities.

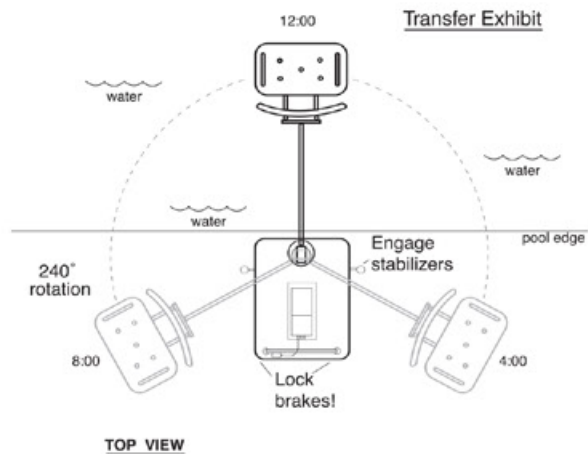

Accessibility: The PAL makes any pool accessible in seconds. It provides 300lb (136kg) lifting capacity together with a 240 degree turning radius for safe transfers away from the pool edge.

Easy to use: Just roll the PAL to the edge of the pool, lock the wheels, set the stabilisers and it's ready for use.

User friendly: The PAL incorporates two powerful 24v actuators operated by a water-proof pendant. This means that the PAL can be operated by either the attendant or the user on his or her own.

Consistent operation: A 24v re-chargeable battery ensures that the PAL will work when you want it to, where you want it to, everytime you want it to.

Negligible maintenance: Virtually maintenance free, made from corrosion resistant materials and coatings.

Specifications for PAL - Portable aquatic lift

Height	1850mm	Length - storage	1400mm
Base height	600mm	Power	24v DC
Base length	890mm	Battery life	30 cycles
Total weight	386kg	(approx)	
Length extended	2640mm	Lifting capacity	136kg (300lb)
