

ZODIAC®
a better life

TRi®

Without doubt the most complete
upgradeable salt chlorinator.

EXCLUSIVE
INNOVATION

Salt chlorination: a 100% automatic solution for treating your pool water.

Efficient, gentle with your skin, practical and reliable: for more than 40 years, Zodiac® salt chlorinators have enjoyed a solid reputation based on their performance and reliability. For enhanced bathing comfort our engineers have created the TRi® upgradeable salt chlorinator. Its base module is a salt chlorinator to which you can add the additional features of automatic pH regulation and chlorine production.

▶ **RESULT:** with TRi®, water treatment becomes really automatic. It is an adaptable solution that can be installed during the construction of the pool or on existing pools.

AUTOMATIC WATER TREATMENT

ZODIAC®

a better life

Why opt for the TRI® Salt chlorinator?

It is a clever system. The TRI® proposes a standard salt chlorinator function, and thanks to its **add-on modules**, your installation can **adapt** according to your needs.

► Focused on pool users' needs, TRI® is a concentrate of Zodiac® expertise designed to offer optimal bathing comfort. Each optional module operates intelligently: TRI® pH and TRI® Pro automatically measure and regulate the pH level; as a complement, TRI® Pro automatically regulates chlorine production adapting to different conditions (water temperature, stormy weather, pool cover...). Thanks to its upgradeability, TRI® offers an economical solution.

Complete and upgradeable...

The choice is yours: pH regulation (TRI® pH module) or pH regulation + chlorine production (TRI® Pro module).

| Function | Optional module TRI® pH | Optional module TRI® Pro |
|-----------------------------------|-------------------------|--------------------------|
| Salt chlorinator | x | x |
| pH regulation | x | x |
| Regulation of chlorine production | | x |

AN EAGERLY AWAITED SYSTEM!

76%

of pool owners would opt for automatic regulation of chlorine production!

70%

of pool owners are convinced of the efficiency of associating salt chlorination with automatic pH regulation.

Market survey 2005 / 612 pool owners, Axiom Consodata

You'll love its user-friendliness!

Simple menu and simple programming

SAFE SYSTEM:
automatic stop when there is not a sufficient water flow in the cell

MAINTENANCE FREE:
self-cleaning electrodes by adjustable polarity inversion

RELIABLE:
titanium electrodes coated with an exclusive alloy

- Treats from 40 to 150 m³ of water (volume for 8 hrs filtration/day)
- Chlorine production: 10 to 35 g/hr
- For all types of pools (rigid pipe-work Ø 50 or 63 mm) and surfaces
- Installation during the construction or on existing pools
